

Open Letter to Leaders of CA, Alberta, BC and First Nations in CA from Krishnan Suthanthiran, President/Kitsault Energy

WASHINGTON, DC, USA, January 17, 2023 /EINPresswire.com/ -- The president of Kitsault Energy (KE), Dr. [Krishnan Suthanthiran](#), PhD, will be attending the BC Energy Forum in Prince George, BC, Canada, January 17-19, 2023.

For the past 10 years, KE has been proposing a Multi-Energy, Dedicated Energy Corridor from northeast BC to northwest BC, to Kitsault/Observatory Inlet north of Prince Rupert, BC, Canada, with a dedicated Energy Port/Export Terminal.

This project is the most sensible—environmentally and economically—to export all of the energy products of Canada to Asia. It is significantly less expensive than all other energy projects that are currently under development and would have the least impact on the environment.

KE is a multi-energy, green energy company in producing/exporting LNG/Butanol from Natural Gas Feedstock, Hydrogen, Bio Fuels and Small Modular Reactors (SMRs). A dedicated floating terminal/port can be established at the Observatory Inlet 25 KM south of Kitsault, BC, Canada. Kitsault serves as the housing for staff accommodation with a built in town that includes recreational facilities.

Butanol, used in Russia as 100 octane fuel in diesel/gasoline automobiles/trucks, can reduce the transportation pollution by 60% or more. It is similar to ethanol, methanol, etc. and can be used as an alternative to CNG, LNG, diesel, gasoline and propane. It is less expensive to produce, transport, receive and distribute to any terminal/port or current gasoline station and does not

require a dedicated expensive infrastructure to receive or export. The engines or power plants require little or no modification.

KE, in partnership with TeamBest Global and [Best Cure Foundation](#), will establish Best Cure Proactive Preventive, Primary Care and Wellness and Medical Centers, in a Hub-and-Spoke Model with Express and Mobile Clinics along the pipeline routes. In addition, the partnership will also establish and operate vocational schools/training centers and offer jobs to First Nation Aborigines.

KE has customers for all of the energy products and is in the process of seeking further cooperation from the First Nation communities, provincial and Federal Government leaders, and others, while raising the needed funds for the projects, design, development and completion to benefit everyone in Canada and globally.

Please feel free to contact Dr. Krishnan Suthanthiran at krish@teambest.com. Thanks a million, have a fantastic safe and healthy week and a very successful BC Energy Forum in Prince George, BC, Canada.

“

KE's multi-energy project is the most sensible—environmentally and economically—to export all of the energy products of Canada to Asia.”

*Krishnan Suthanthiran,
President/Founder of
