

Open Letter to the Quad Leaders, Vice President Kamala Harris and the PA Governor Josh Shapiro from Dr. Krishnan Suthanthiran

WASHINGTON, DC, UNITED STATES, September 23, 2024 -- The September 21, 2024, Wilmington Declaration Joint Statement from the Leaders of Australia, India, Japan, and the United States is a fantastic press release from the Quad leaders.

President Joe Biden, Vice President Kamala Harris, and Krishnan Suthanthiran—President and Founder of TeamBest Global (TBG) companies and Best Cure Foundation (BCF)—share many similarities. Each of them has experienced the loss of a family member due to cancer and has dedicated their careers to public service. Both President Biden and Suthanthiran began their careers in the U.S. in 1972. President Biden has served in the government for over 50 years. Vice President Harris has had a career as a prosecutor, Attorney General, and Senator before becoming the U.S. Vice President. Suthanthiran has dedicated his career of over half a century to healthcare, products and technology manufacturing, and services, with extensive international experience, traveling to more than 20 countries. His companies are leaders in many medical technologies and products, providing essential resources to hospitals and medical centers globally. Currently, Suthanthiran is working on transitioning cancer screening from high-tech, expensive technologies to modern, high-tech, low-cost high-resolution premium ultrasound technologies by manufacturing, establishing, and supporting diagnostic centers around the world.

For the past 15 years, Suthanthiran has been attempting to get the attention of Quad Leaders and the former President Barack Obama and First Lady Michelle of the United States. Starting in 2010, Suthanthiran began writing letters to members of the U.S. Congress and other world leaders, but he has never received a response.

Why wait 25 years? We can reduce the death and suffering from cancer, cardiac, diabetes, obesity, infectious and other diseases by 50% or more starting today. TBG companies and BCF are leaders and pioneers in medical technologies and healthcare delivery concepts and serving globally.

Suthanthiran's journey to address cancer began after losing his father to the disease in 1968. He has since dedicated over 50 years to finding ways to lower the cost of treatment and significantly improve clinical outcomes on a global scale. Suthanthiran launched his Global War on Cancer on April 29, 2015, in memory of his late father. BCF's goals are to reduce deaths and suffering from cancer, heart disease, diabetes, infectious diseases, and other illnesses by 50% or more, at a lower cost, by 2040 or sooner.

Suthanthiran has a two-part plan to accomplish his goals. In part one, he plans to establish BCF Pro Health Centers – BCF non-profit proactive, preventive, primary medical, dental and eye care wellness centers. Part two involves the establishment of BCF Medical Centers for Treatment (similarly non-profit), which will focus on all diseases as specialty medical centers and all centers operating 24/7.

As part of this plan, Suthanthiran aims to establish over a million square feet of high-tech manufacturing, office, R&D, packaging, crating, and storage space in the USA and India. TBG currently has available properties in India and the USA, which will be supplemented with new spaces to be acquired in both countries.

The current plans are to establish BCF Pro Health and Medical Centers that include 500,000 sq. ft. of space for manufacturing high-tech medical technology and products in the suburbs of Pittsburgh, Pennsylvania, with an expected establishment in 2025.

Suthanthiran has traveled extensively in India and other countries, conducting seminars and outlining his plans for Best Cure Pro Health Centers, Best Cure Cancer Centers and Best Cure Medical Centers.
